

COMPANY OVERVIEW

Tecnosistem SpA is a modern company providing engineering and consulting services. The company was founded in 1976 by Fiore Family and since then it has been consolidating and increasing its competences starting an evolutionary process which made Tecnosistem a unique player in the Italian engineering landscape, due to its broad skills and expertise for different markets: Infrastructures, Civil, Automotive, Aerospace, Rail, Defense.

Our main customers are: Building firms, Real Estate, Public bodies.

MISSION

Our company's goal is to create value for our Clients, employees and shareholders.

We provide high quality/price ratio services for our clients. We strengthen the professional skills of our employees, improving their social and economic status.

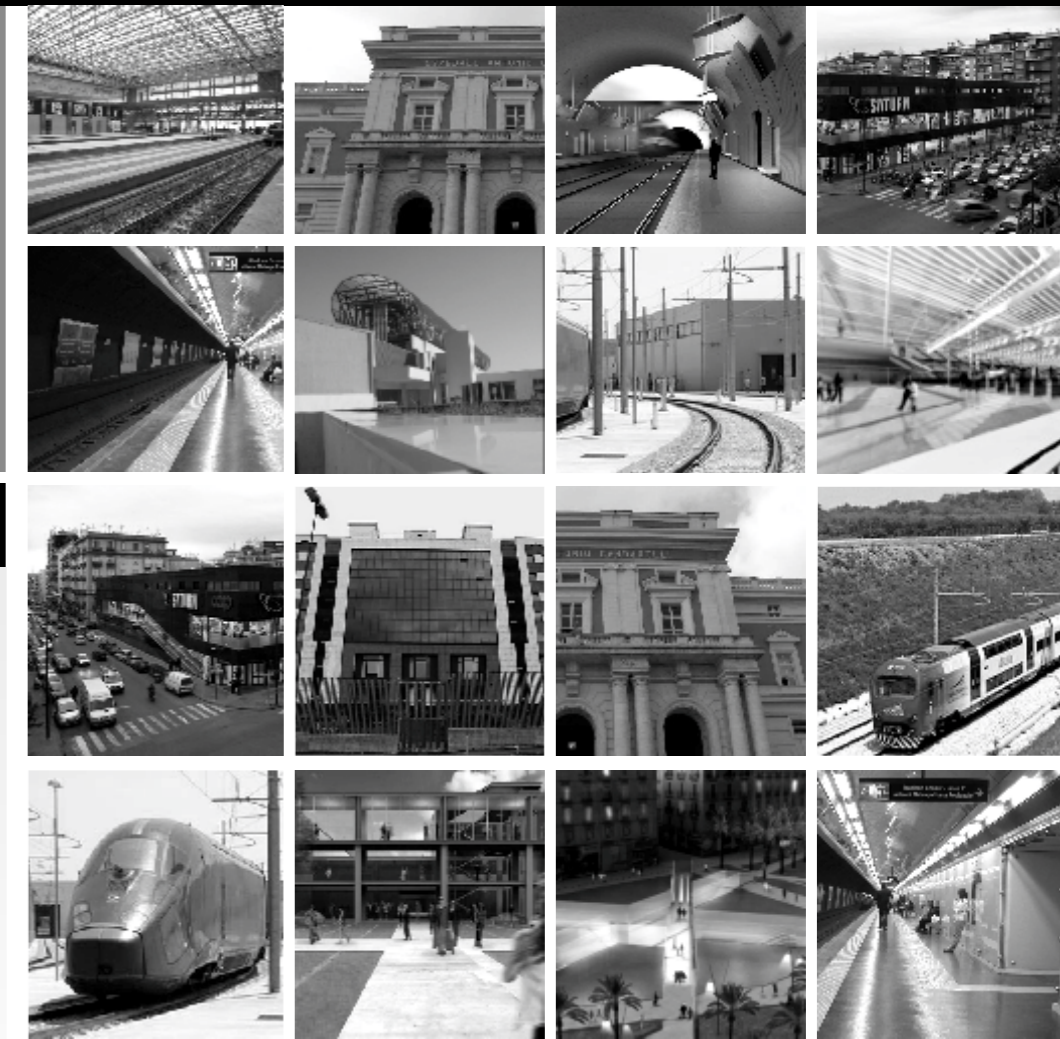

We successfully maximize company profits for shareholders.

TECNOSISTEM SpA provides a full range of engineering services required by our clients. We meet the need for flexibility often required by the market, offering the best working procedures on all occasions:

- on site consulting services;
- on site work-package execution;
- off-site work-package execution;
- off-site work-package execution with an on-site representative.

Our ability to work with companies involved in different industrial sectors over the years allows us to propose very convenient contractual conditions to our clients: this is the result of our capability to identify and use the 'best practices' acquired during our long history.

INFRASTRUCTURE / BUILDING MARKETS

The infrastructure area has been one of our primary markets since the foundation of our company: we pride ourselves on having more than 35 years of experience in planning, designing and managing important projects both for the public and the private sectors.

Over the years Tecnosistem has acquired the professionalism needed to successfully support its clients in creating and implementing various projects both for the private and public sectors. Tecnosistem is able to provide full support starting from development of new ideas to technical and financial feasibility studies, project management, evaluation of the environmental and aesthetic impact, construction management, certification, in-service performance and building maintenance.

RESEARCH AND DEVELOPMENT

Over the last five years, our company has been increasingly involved in a number of Research and Development projects involving large companies, SMEs, Universities and Research Centers. In particular, we have been involved in innovation related activities aimed at developing novel products/services and precompetitive development activities. We are an innovation driven company and this is clearly reflected in our projects and consulting services.
